

**REMARKS**

Claims 18-30 were pending in the application and have now been cancelled in favor of method claims 31-45 in order for the Examiner to give weight for the process steps which synergistically allow the formation of the cap of the present invention using a co-injection technique that provides for a practical and cost-effective gripable cap particularly for containers for consumer products. In light of these amendments, it is believed that claims 31-45 are allowable over the art of record and allowance is respectfully requested.

Respectfully submitted,

JOHN J. HAHN, ET AL.
